## MISSION: BUILDING OPPORTUNITIES

Cornhusker State Industries (CSI) is **building opportunities** for incarcerated men and women through meaningful work trajectories that serve as a foundation for transformative change and successful community reintegration.

CSI provides comprehensive training, education, and certification courses that equip individuals with the skills and confidence to successfully reenter their communities.

## VALUES

**Individual Growth** - We invest intentionally in CSI staff and workers to develop their individual potential and contribute to success inside and outside of the organization.

**Integrity** - We strive to model integrity in all that we do, acknowledging that everyone plays an important role in demonstrating professional behavior and respect.

**Engagement** - We seek to engage our stakeholders to sustain high levels of motivation, teamwork, collaboration and accomplishment.

**Communication** - Communication is vitally important to propel our vision, share knowledge, offer feedback and celebrate success.

**Quality** - Quality is built into all processes, products and services so that we may be a more effective organization.

**TRANSFORM Nebraska** is an integrated framework designed to comprehensively address the rehabilitation needs of individuals within the correctional system. By bringing together a wide range of rehabilitative services, programs and initiatives under one cohesive umbrella, it incorporates multiple dimensions of rehabilitation, promoting personal growth, behavior change and reentry success.

The 5-Key Model for Reentry and Well-being Development™ is a transformative, evidence-based approach to rehabilitation that recognizes the inherent strengths within each individual. It is designed to support personal growth and long-term success by addressing the key components of well-being that are critical for successful reintegration into the community.

While Cornhusker State Industries workers can develop in all five key areas while employed, the most significant focus is Meaningful Work Trajectories. Workers can earn certificates and receive specialized training while employed at CSI, which can potentially expand their post-release employment opportunities. They also apply lessons learned to engage positively and build relationships with co-workers and employers and apply healthy thought patterns to effectively cope with potentially stressful workplace situations.
